

AIWO

Love Yourself

AIWO: a Japanese word which translates as Love Yourself.

A Transformational Experience *to Optimize Your Health and Wellbeing.*

*"A healthy person has a thousand wishes,
but a sick person has only one."*

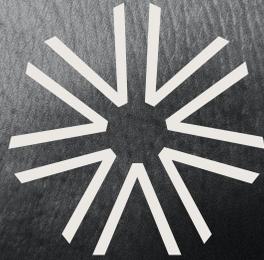

Indian Proverb

AIWO

4

What is *AIWO*?

AIWO is a science-driven wellness centre that provides personalized and advanced diagnostics as well as a range of treatments to help you optimize your health and wellbeing. AIWO is your trusted guide in your journey towards preventing and reversing metabolic diseases. Our team of world-class physicians provide a healthcare ecosystem backed by scientific advancement that can help detect and address a number of health conditions, including: Cardiovascular Disease, Fatty Liver Disease, Type 2 Diabetes, Polycystic Ovarian Syndrome, as well as early cancer detection.

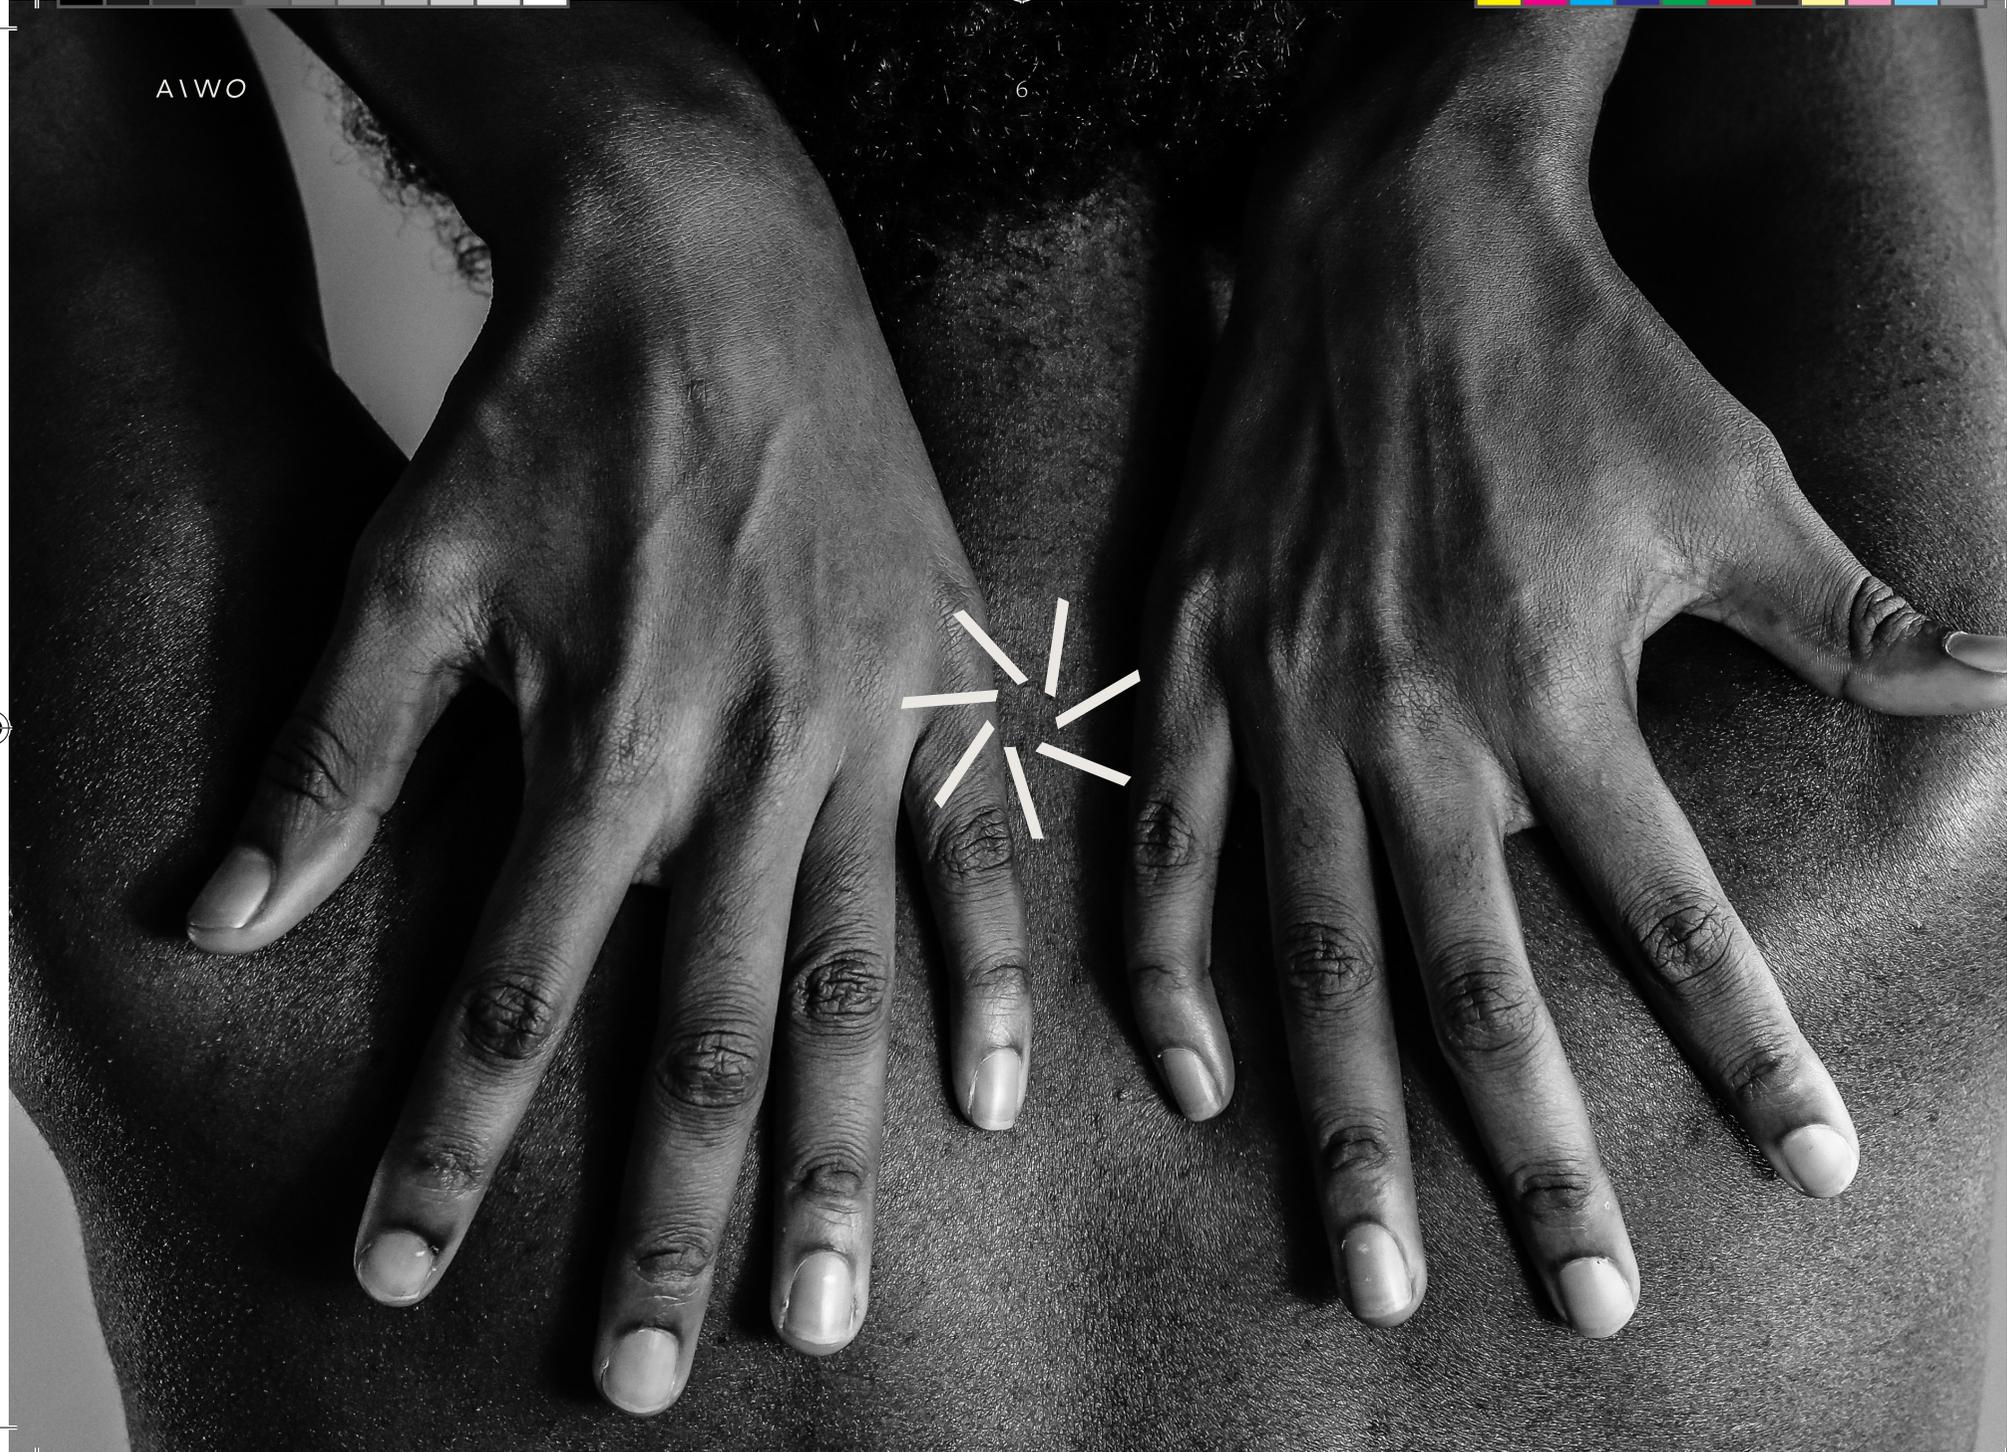

AIWO focuses on a person's wellness and not just their illness or condition. Our advanced diagnostic tools, specialist consultations, and personalized supplement plan help you to take ownership of your health and pursue wellness as a way of life.

In addition to in-depth diagnostics for disease prevention and early detection, we offer holistic spa treatments and a customized physiotherapy program.

AIWO

6

Mission & Strategy

AIWO's mission is to empower people to take preventive care of themselves towards achieving optimal health and well-being. We diagnose and recommend a tailor-made wellness protocol to guide you on your journey to greater physical and mental performance.

Vision

AIWO seeks to enhance the lives of people by making preventive healthcare more accessible and personalized.

AIWO 181

Blood test

To live your longest and healthiest life possible, your body needs to be periodically tested and recalibrated.

AIWO 181 is a package that covers 181 tests including Cardiac Risk markers, Tumour panel, Arthritis profile, Pancreas profile, etc. These tests serve as early warning signals which can help us prevent future ailments.

Following an initial personal consultation with our team to assess your needs and general state of health, you will undergo a full range of testing starting with in-depth blood testing that includes more than 150 biomarkers. Before your stay ends, a full report with lifestyle recommendations as well as supplements needed will be provided.

Rheumatoid Factor (RF factor)

LIPID PROFILE (8)

LDL Cholesterol
Total Cholesterol
HDL Cholesterol
Non - HDL Cholesterol
Triglycerides
VLDL Cholesterol
LDL/HDL Ratio
TC/HDL Cholesterol Ratio

Medical *Diagnostics*

ECG

An ECG, or electrocardiogram, is a test that uses sensors connected to the skin to detect the heart's rhythm and electrical activity. ECG is a common and painless test used to quickly detect heart problems and monitor the heart's health.

An ECG can help detect:

Arrhythmias

Where the heart beats too slowly, too quickly, or irregularly.

Coronary heart disease

Where the heart's blood supply is blocked or interrupted by a build-up of fatty substances.

Heart Attacks

Where the supply of blood to the heart is suddenly blocked.

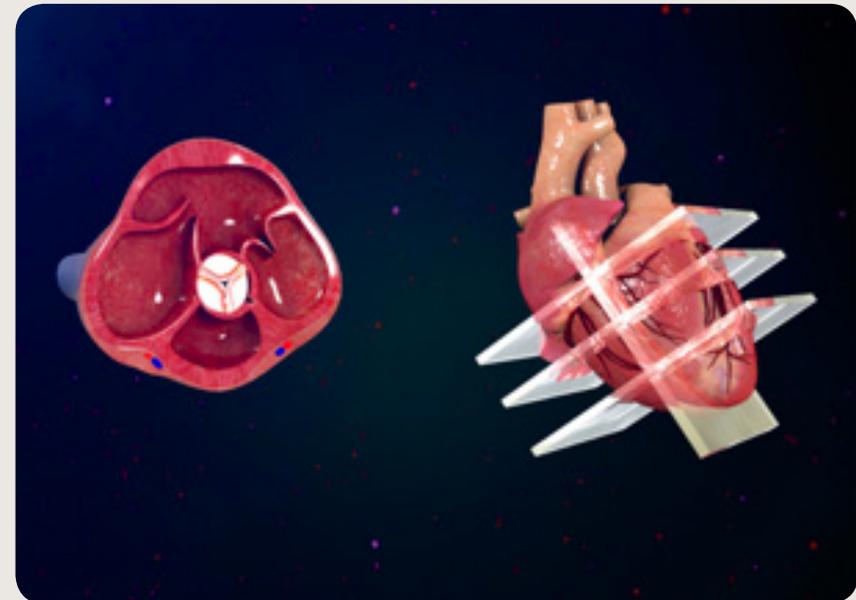

Cardiomyopathy

Where the heart walls become thickened or enlarged.

ECHO

Echocardiography (ECHO) is an imaging technique which shows the functioning of the heart muscle, its valves and several other parameters. This test allows your doctor to monitor how your heart and its valves are functioning.

An echocardiogram can assess heart function and detect and follow the progression of heart disease and cardiac masses. It can help diagnose *atherosclerosis, cardiomyopathy, congenital heart disease, and cardiac tumours.*

Ultrasound Screening of Abdomen and Pelvis

An ultrasound, also named sonography, of the abdomen and the pelvic makes it possible to see your abdominal and pelvic organs: liver, kidneys, bladder, uterus, ovaries, prostate and seminal vesicles and gastrointestinal organs, including the gallbladder, spleen, pancreas, bladder, and more.

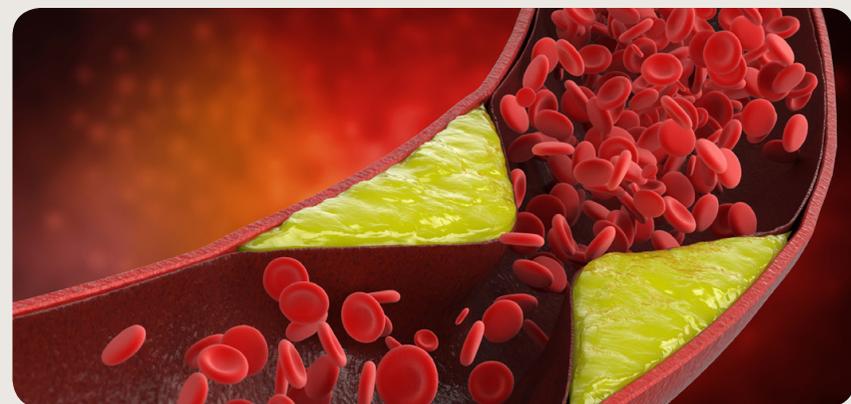

Ultrasound can be used to detect early as well as locally advanced cancers. It can also help check for kidney stones, liver disease, and tumours.

Coronary Artery Calcification Score (CT)

Computed Tomography, more commonly known as a CT or CAT scan, is a diagnostic medical imaging test and is a non-invasive way of obtaining information about the presence, location and extent of calcified plaque in the coronary arteries—the vessels that supply oxygen-containing blood to the heart muscle.

Heart CT scans quickly and automatically measure how much and how dense the levels of the mineral are in the blood vessels that nourish the heart's arteries. The coronary calcium score is predictive of non-cardiovascular diseases too. Plaque in the arteries is the result of cumulative damage and inflammation, and vulnerability to injury and chronic inflammation likely contributes to diseases like cancer, kidney and lung diseases, as well as cardiovascular disease.

Frequently Asked Questions

Why AIWO?

We provide a holistic approach to wellness treatment in AIWO. It includes reduced costs, the availability of the latest medical technologies, AI-based smart reports and compliance with international quality standards.

Where do I stay during my wellness treatment?

You will stay at the five star Leela Palace hotel, 30 minutes from Chennai international airport, where AIWO Wellness Center is based.

Can I come with my wife or partner for the wellness treatment?

Yes, they also can avail of wellness treatment, at the same price. Or if they do not take wellness treatment, sharing the room would cost an additional charge of \$150 /night. If they need a separate room, it would cost \$300/night with food, laundry, transportation and services.

Is accommodation included in the package?

Yes, the package covers food and accommodation at a five-star hotel as well as laundry and airport transportation cost. However, alcohol is not included, and we do not recommend taking alcohol during your stay.

Who will assist with the visa process?

You can apply online for a tourist visa by following this link: <https://indianvisaonline.gov.in>. AIWO can also assist when required.

How do I know my personal details are confidential and safe?

AIWO makes sure to follow ethics and privacy guidelines to protect your medical records, personal health information about therapies and mental health needs.

Will I get assistance if I have any pre-existing illness?

For pre-existing illnesses, AIWO will assist you to get an expert opinion from renowned hospitals in Chennai.

What about my appointment/meeting with the doctor?

We will arrange for your appointment with the doctor at your convenience.

How can I share my medical records before arrival?

You can email us at info@aiwo.com.

What is the total package cost?

The total package cost is \$4995. For couples or those sharing a room, the cost is \$9000 for two people.

How long should I stay for my wellness treatment?

We recommend a stay of seven full days to go through the complete program, but if not possible, a minimum of five full days.

- For 5 days program, it would cost \$4995
- For 7 days program, it would cost \$6000

How to get in touch with the AIWO?

For more information on our offerings, contact us on info@aiwo.com or Whatsapp +91 96000 74567. We are here to support you.

Is sightseeing available?

There will be an abundance of free time to enjoy exploring Chennai and its famous landmarks. We can arrange a guide and car and schedule it based on your convenience.
